# About us

- ▶ The "Green Pellets" office is located in Russia, Saint Petersburg city. It is a well-developed industrial center and important port on the Baltic sea.
- ▶ The company has successfully practiced foreign economic activity for more than 10 years, supplying wood materials to Russia from Europe and the US, as well as from Europe to Russia.

“Green Pellets” works with the factories that are located far from major traffic interchanges. The infrastructure of the ports of St. Petersburg allows to accumulate and ship the products of these producers to foreign consumers. Ports of St. Petersburg handle about 464,498 containers a year \*. For transporting

\* The ports of Ust-Luga, Vyborg, Saint Petersburg are taken into consideration. The data for 2016 from “The Administration of the Baltic sea ports” web-site <http://www.pasp.ru/arhiv>

the pellets in bulk it is possible to load the 6000 tons ships in the port of Vyborg, 5000 tons ships on the timber terminal "Factor", up to 40,000 tons on the Yug-2 terminal of the "Ust-Luga" port.

- ▶ There is a possibility of storing large volumes of ship lots in the ports which we work with. In the port of Ust-Luga it is possible to store up to 40,000 tons of pellets simultaneously, up to 10,000 tons of pellets in the timber terminal "Factor" and up to 10,000 tons of pellets in the port of Vyborg.

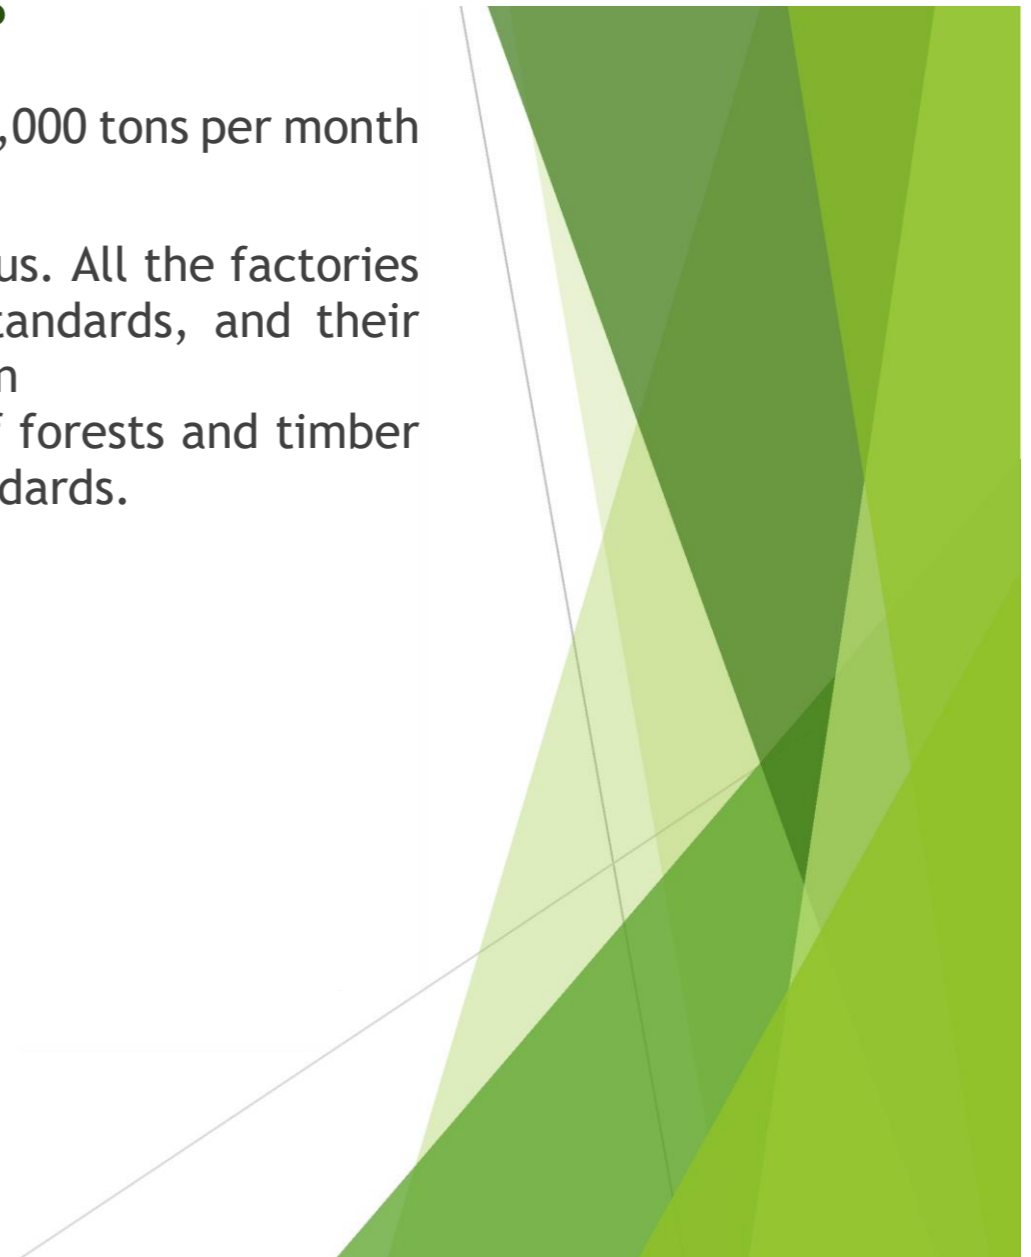

# What product do we offer?

- ▶ Wood pellets for heating the private sector, as well as for the needs of industrial enterprises, boilers and power plants.
- ▶ Diameter 6 and 8 mm.
- ▶ Ash content from 0,3% to 2%.
- ▶ No chemicals.
- ▶ Delivery by ships in bulk or in containers in big bags up to 1250 kg.
- ▶ The factories that we represent dispose the following certificates: ENPlus A1, ENPlus A2, FSC, SBP (depends on the factory).

# Advantages of working with “Green Pellets”

1. We are ready to ensure a stable supply of the pellets from 30,000 tons per month through logistics companies with a guarantee of cargo safety.
2. You can be assured of the quality of the pellets offered by us. All the factories represented by “Green Pellets” Ltd meet high production standards, and their products have ENPlus quality certificates. Also these production sites have FSC and SPB certificates. This guarantees the use of forests and timber on a legal basis in accordance with modern environmental standards.

- ▶ 6. The pellets are shipped from the ports of St. Petersburg, which do not freeze in winter and function all year round.
- ▶ 7. The agency agreement with manufacturers and direct contacts with carriers guarantee a stable price for the fulfillment of the terms of the contract.
- ▶ 8. The company has financial support from banks (both Russian and European) for large-scale transactions.

The market of solid biofuel in Russia is developing rapidly due to the huge reserves of forest resources in the country. Pellet production is growing at a high pace, new factories are regularly being built, producing high-quality and efficient fuel in accordance with international standards. “Green Pellets” helps consumers find reliable suppliers on the Russian market, and factories improve their manufacturing processes so that their products are highly valued on the foreign biofuel market.

**Thank You for attention!**
